

Radiata pine

(*Pinus radiata*)

Pinus radiata or radiata pine is a coniferous tree that belongs to the family of *Pinaceae*. Thanks to its rapid growth, fast cutting maturity, and excellent quality of the wood, it is among the most cultivated coniferous species in the world. In the product range of Thermory, the radiata pine materials are heat-treated.

Features of the radiata pine sauna materials of Thermory

- ▶ With a beautiful characteristic wood pattern, it's a very lightweight and exclusive finishing and sauna material.
- ▶ Wood is well-suited to the sauna benches as it does not secrete the resin or produce splinters, there are no exposed knots and it does not heat up.
- ▶ The heat treatment makes the wood colour dark brown, providing the wood with a particularly exclusive look. The wood pattern can be further highlighted by using brushed material.
- ▶ Possibility to use luxuriously wide, up to 185 mm boards in sauna design.

Heat-treated radiata pine products

PROFILE STS₄

- ▶ 15 x 90 mm
- ▶ 15 x 140 mm
- ▶ 19 x 185 mm

USE ▶ Wall panels

PROFILE SHP

- ▶ 26 x 92 mm
- ▶ 26 x 140 mm
- ▶ 26 x 185 mm

USE ▶ Sauna benches

In addition, the selection includes mouldings, edge boards, and various finished products: bench modules, back rests, movable benches.
