

Dune thermo-spruce wall panels – bring home the touch of rugged nature.

Create a rustic yet modern style in your home with these effortlessly attractive wall panels. Dune by Thermory evokes the spirit of the desert, combining ruggedly worn spruce panels with a strikingly natural look and feel, all with the durability and dimensional stability that intense thermal modification provides.

Uncompromisingly stylish with a warm, natural charm, Dune interior wall panels have a unique texture and appearance thanks to their coarse embossed pattern that instantly transports you to the great outdoors. Unleash a stirring sense of adventure and natural harmony within the comfort of your own home.

THERMALLY MODIFIED WOOD

Makes the wood more durable and lowers its moisture content

DURABLE

Highest class for wood durability

DISTINCTIVE KNOTS

Showcasing the natural beauty of spruce

EMBOSSING

Creates a beautiful structure without changing the wood's properties

SUSTAINABLE

Wood sourced from responsible forests with chemical-free thermal modification

QUALITY MATERIALS

Our timber is carefully inspected and harvested from sustainably managed forests

PROFILE	WOOD SPECIES	THICKNESS (MM)	WIDTH (MM)	COVERING WIDTH (MM)	THERMAL MODIFICATION LEVEL
C15 	Thermo-spruce	20	186	175	Intense

Our thermally modified spruce, with its attractive knots and natural warm color, also comes with the Nordic Swan Ecolabel, which certifies that the wood originates from responsibly managed forests and is free of chemicals.
