Arc Sauna

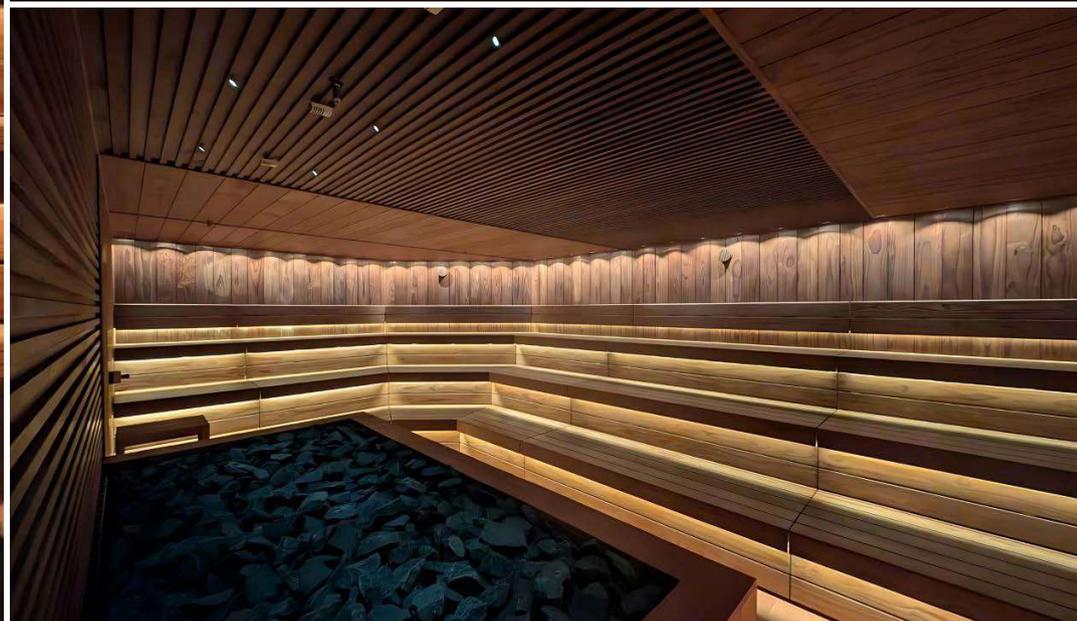

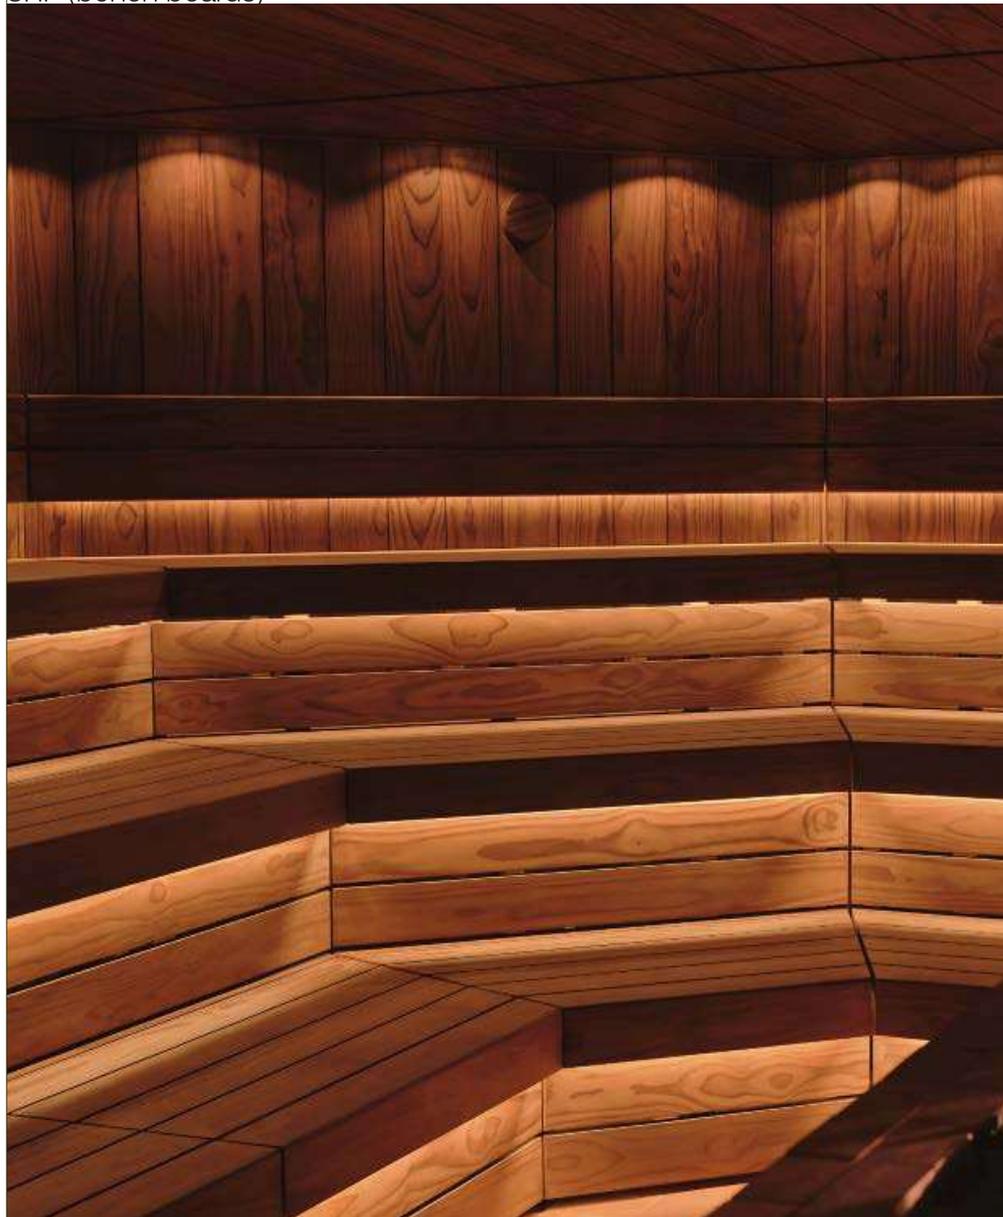

UNITED KINGDOM | 2025

ARCHITECT | Finnmark Sauna
DEVELOPER / BUILDER | Finnmark Sauna
PHOTO | Max Newport

THERMORY PRODUCTS | Dark thermo-alder Step (wall behind sauna heaters), thermo-radiata STS4 185mm (walls), Thermo Radiata 140mm SHP (bench boards)

At the core of an innovative communal wellness club, The Arc is the UK's largest sauna – crafted to unite people through heat and relaxation. Clad in dark thermo alder and knot-free thermo radiata pine, its 65-seat U-shaped design and triple Helo Magma heaters create a luxurious, authentic, and social sauna experience.

Arctic Ape Contrast Therapy Pod

REPUBLIC OF SOUTH-AFRICA | 2025

ARCHITECT | Designed by Arctic Ape™ Saunas & Ice Baths

DEVELOPER / BUILDER | Arctic Ape™

PHOTO | Craig Nerwich

THERMORY PRODUCTS | Combination of thermo-pine & thermo-spruce
(C3 grooved cladding, straight edge 140x20 / 115mm T&G)

The Arctic Ape™ Contrast Therapy Pod redefines wellness in South Africa by uniting a sauna, ice bath, and outdoor shower in one elegant structure. Featuring a distinctive blend of Thermory timbers, this innovative design offers a seamless, high-end contrast therapy experience unlike any other in the region.

Auroom Kaia Outdoor Sauna Model

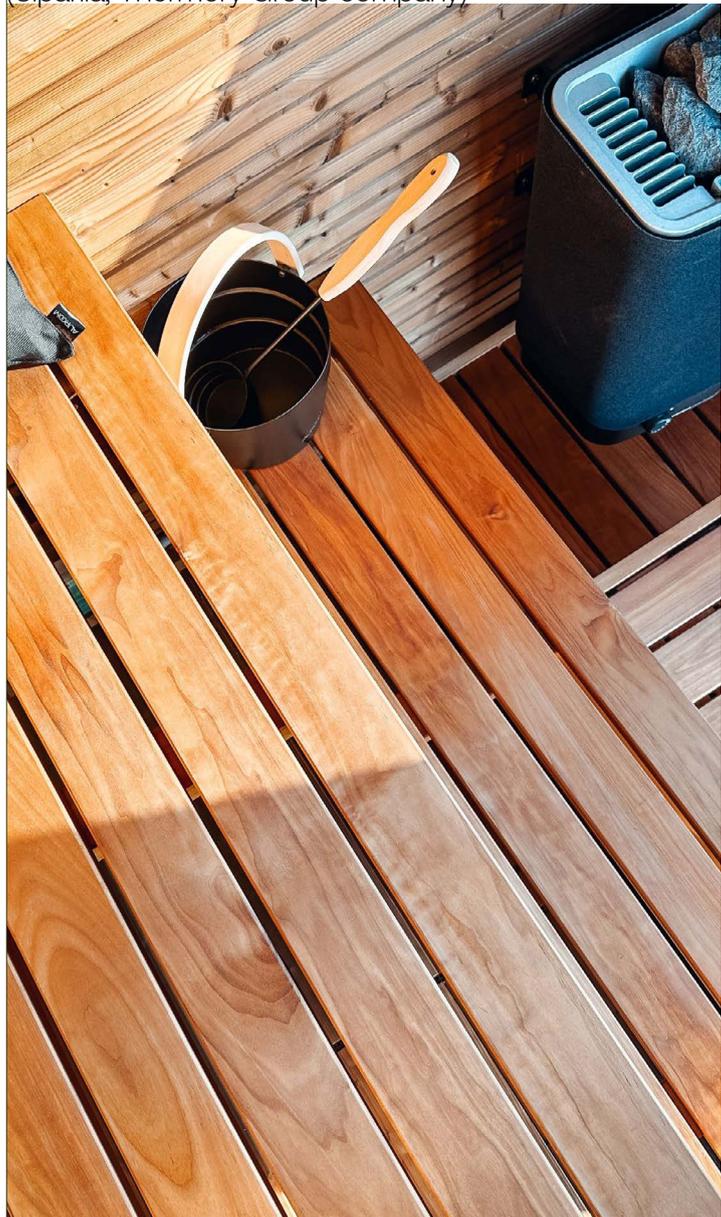

LATVIA | 2025

ARCHITECT | Auroom OÜ, Totonou and Auroom Saunas SIA
DEVELOPER / BUILDER | Auroom Saunas SIA
PHOTO | Auroom Saunas SIA

THERMORY PRODUCTS | Interior: SHP thermo-aspen 28 x 90 mm; SHP thermo-aspen bench boards; Thermo-spruce exterior cladding, 47x100 (Siparila, Thermory Group company)

The Auroom Kaia redefines the barrel sauna, merging craftsmanship, innovation, and global collaboration. Kaia transforms the classic barrel into a modular, design-led architectural object. Built entirely from Thermory's durable, sustainable timbers, it combines elegance, flexibility, and visionary engineering – ushering in the era of the design barrel sauna.

Baltimore Ravens' Under Armour Performance Center

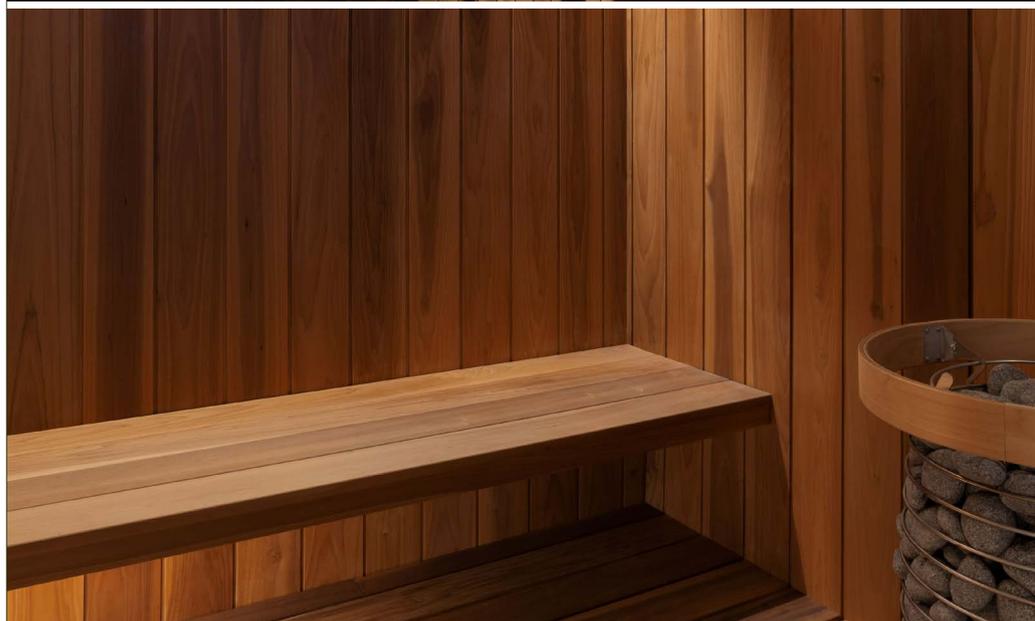

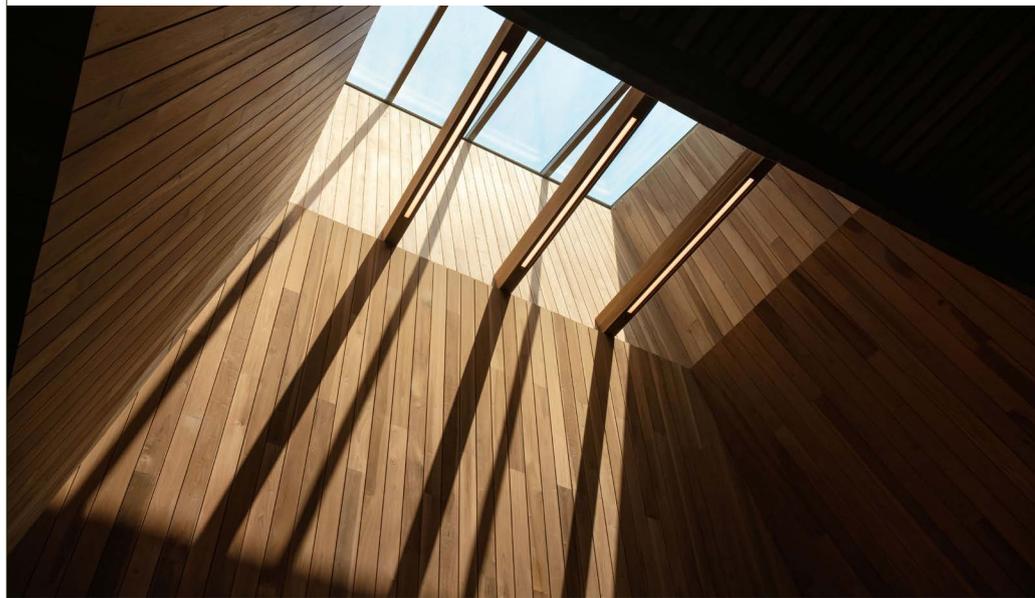

USA | 2025

ARCHITECT | ZGF Architects
DEVELOPER / BUILDER | The Whiting-Turner Contracting Company
PHOTO | © Ema Peter Photography

THERMORY PRODUCTS | Thermo-Magnolia custom C4J profile ceiling;
STS10 tongue and groove boards; Sauna bench boards

ZGF Architects transformed the Baltimore Ravens' "Castle" into a next-generation wellness and performance hub. Featuring Thermory Thermo-Magnolia throughout the hydrotherapy suite and recovery areas, the renovation combines sustainability with biophilic design. Warm wood, natural light, and advanced functionality create a restorative environment that enhances recovery, focus, and team connection.

Community Sauna

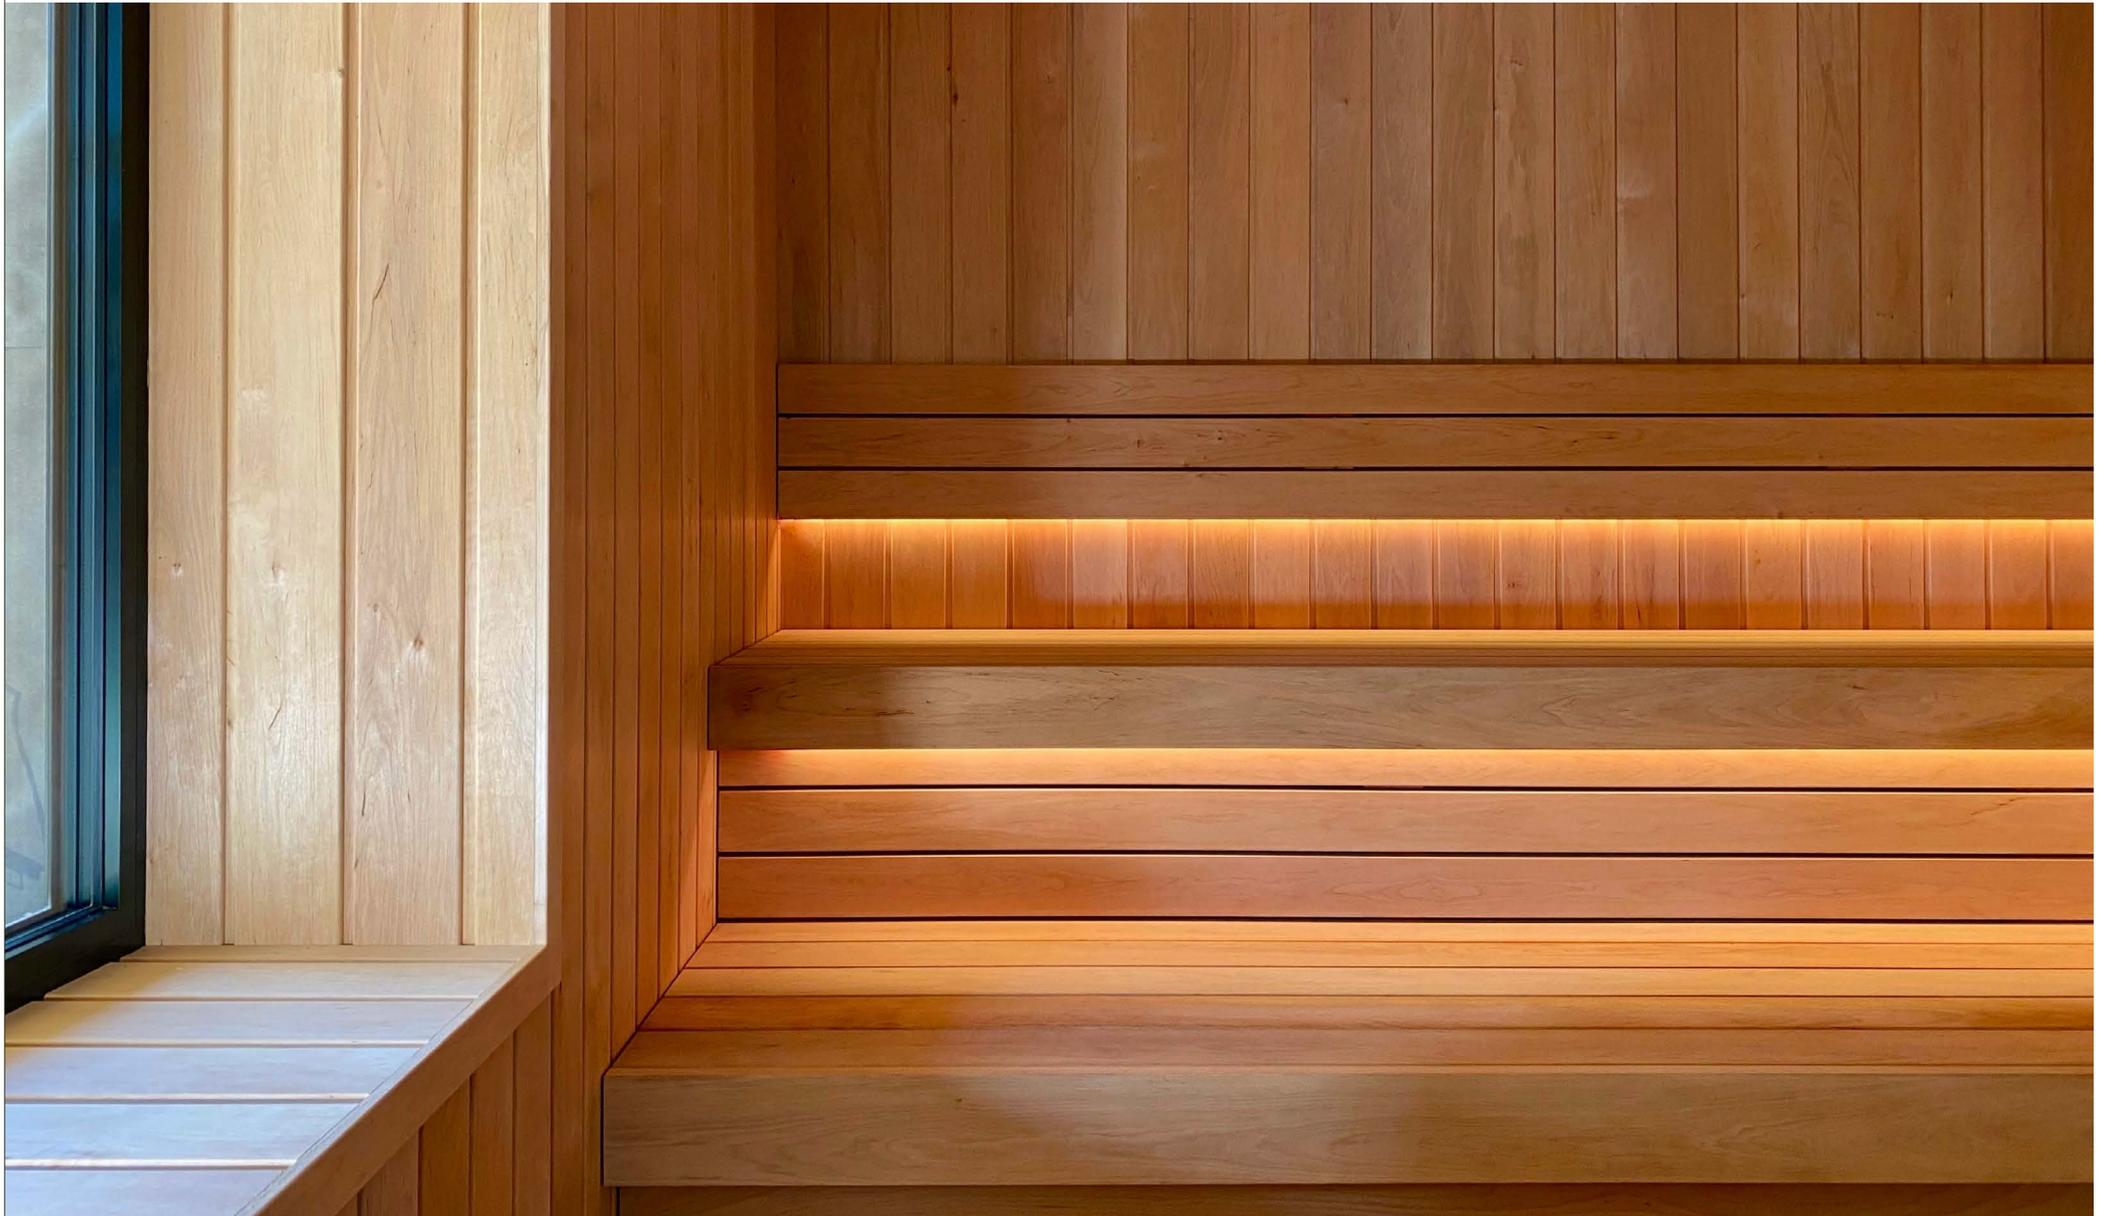

SLOVAKIA | 2025

ARCHITECT | Sauny S.PA
DEVELOPER / BUILDER | Sauny S.PA
PHOTO | Stanislav Papčo

THERMORY PRODUCTS | STP Alder wall panels, SHP Alder bench boards

Defined by simplicity, detail, and honest craftsmanship, this Thermory alder sauna embodies calm, clarity, and function. Designed for a private chalet with space for 10, it avoids excess, celebrating pure material beauty and precise geometry. A timeless, communal retreat where authenticity and design harmony meet.

Good Culture Sauna

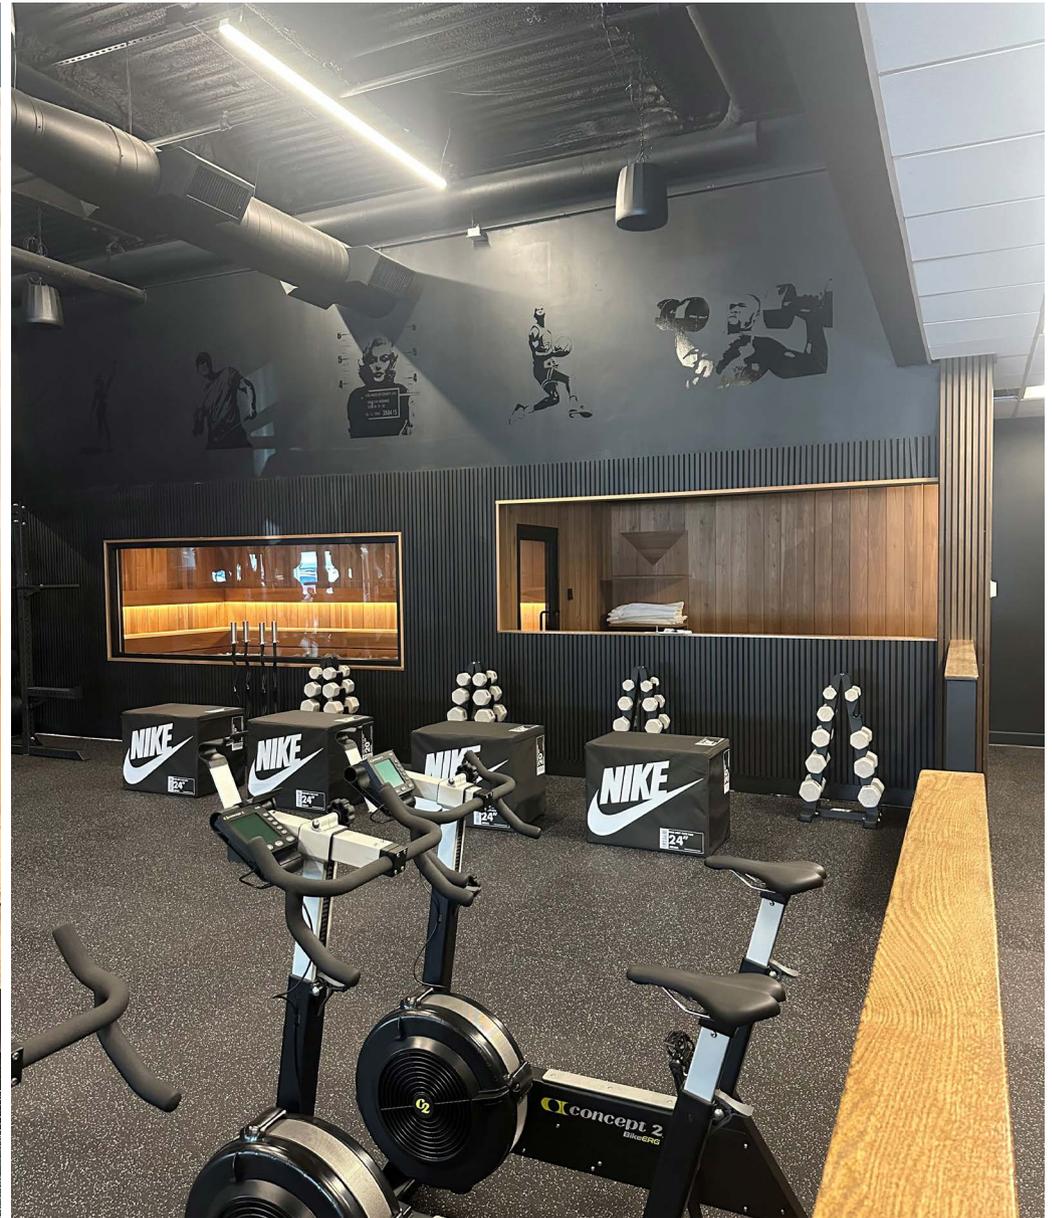

USA | 2025

ARCHITECT | Nick Talio, East Coast Saunas
DEVELOPER / BUILDER | James DiSclafani
PHOTO | Stanislav Papčo

THERMORY PRODUCTS | Thermo Magnolia in STS10 and SHP profiles

The first custom sauna on Long Island, Good Culture Sauna brings authentic Finnish sauna tradition to a modern fitness setting. Featuring expansive use of Thermo Magnolia throughout, it pairs warm craftsmanship with contemporary design – creating a spacious, inviting retreat that bridges wellness, culture, and community.

HeatPraxia Sauna

USA | 2025

ARCHITECT | Steve Simar, Symmetry Sauna
DEVELOPER / BUILDER | Steve Simar, Symmetry Sauna
PHOTO | Steve Simar

THERMORY PRODUCTS | Thermo-aspen 1x4, 5/4 bench, Kyte skirts

Built by sauna professionals for sauna lovers, HeatPraxia is a 30-person community sauna designed for beauty, durability, and comfort. Featuring Thermory materials throughout, it stands out with glowing under-bench lighting that highlights the elegant Kyte skirts, while thoughtful tiered seating maximizes space and relaxation.

Riverside Sauna

ESTONIA | 2025

ARCHITECT | Arctic Finland House
DEVELOPER / BUILDER | Arctic Finland House
PHOTO | Pamela Maran

THERMORY PRODUCTS | Exterior cladding: Thermo-ash shingles

Clad in Thermory thermo-ash shingles, this riverside sauna harmonizes with its natural setting, its texture reminiscent of a pinecone resting by the water. The durable ash shingles offer a nature-friendly alternative—gentle on the landscape and on birds alike, unlike reflective glass structures.

Jõelähtme Juveel Sauna

ESTONIA | 2025

ARCHITECT | Annika Valkna

DEVELOPER / BUILDER | Lasita Aken AS, Dalton Kinnisvara

PHOTO | Karl Kasepõld

THERMORY PRODUCTS | thermo-radiata walls CAR3 20x138,
thermo-pine ceiling C3 20x140, SHP thermo-aspen bench boards 28x140

Created under the principles of Wabi Sabi, this residence blends seamlessly into its natural golf course surroundings. Built with sustainable CLT construction and extensive use of Thermory wood, the sauna continues the home's aesthetic harmony – where exterior, interior, and wellness spaces merge into one timeless, unified whole.

Kuubik Sauna

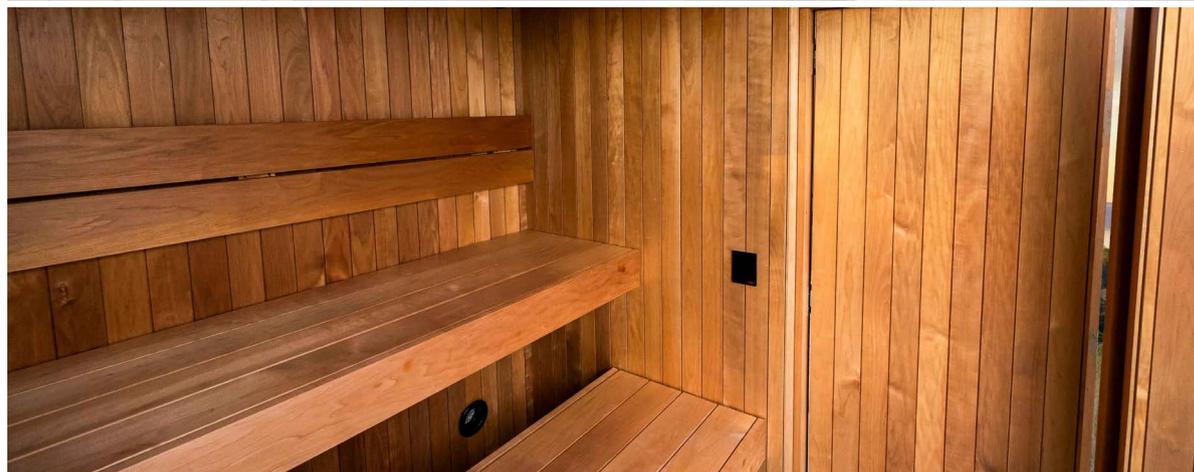

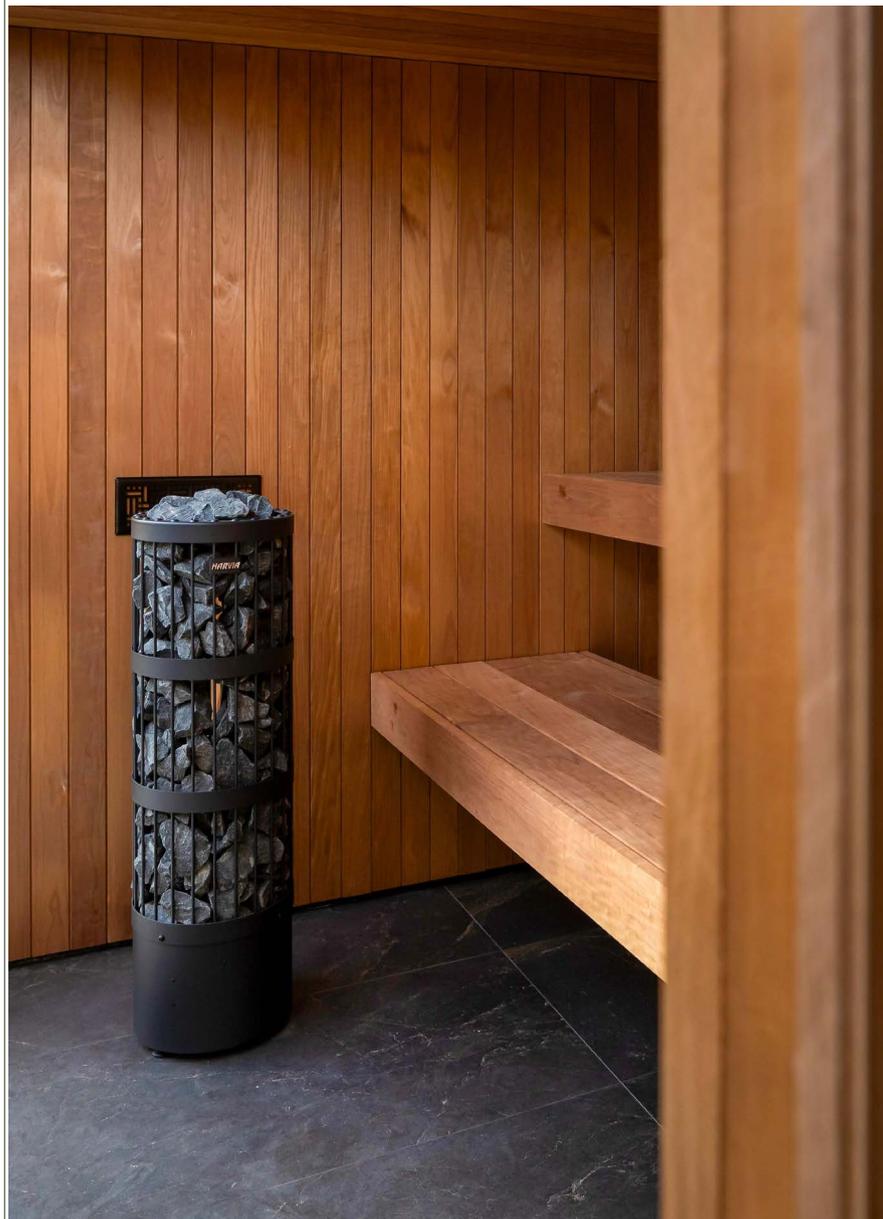

TASMANIA, AUSTRALIA | 2025

ARCHITECT | Wilderness Saunas
DEVELOPER / BUILDER | Wilderness Saunas
PHOTO | Nick Green/ Editor - Marc Illicic

THERMORY PRODUCTS | Thermo-aspen STS4, 140x28, 90x28

The Kuubik sauna blends European innovation with locally grounded sustainability, thoughtfully designed for Australia's harsh climate. Crafted from Thermory Thermo Aspen, it embodies lasting beauty, precision, and strength. Its modular form and seamless glass invite nature in, creating a refined, enduring wellness retreat that celebrates global sauna culture.

Les Bains de Lavey Sauna Centre

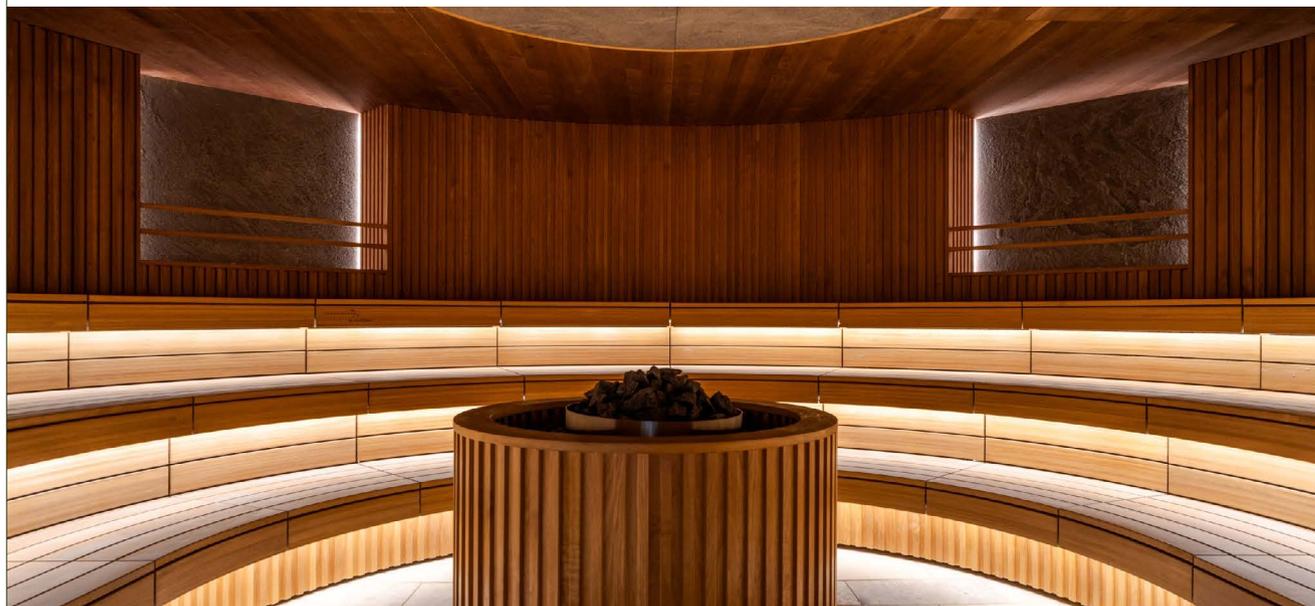

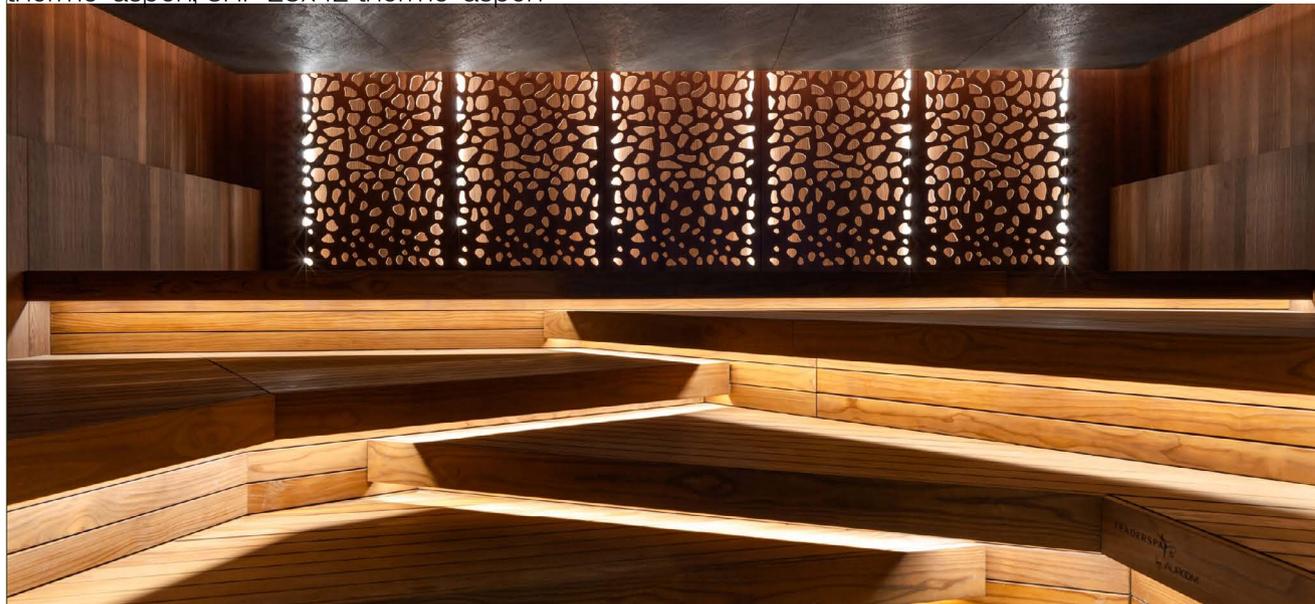

SWITZERLAND | 2025

ARCHITECT | Leaderspa Pro SA
DEVELOPER / BUILDER | Auroom OÜ
PHOTO | Samuel Devanterey; Guillaume Cottancin

THERMORY PRODUCTS | STEP 27x64 thermo-aspen, SHP thermo-aspen,
SHP 26x92 / 26x140 thermo radiata pine, SHP Alder, STS4 15x68 / 15x90
thermo-aspen, SHP 28x42 thermo-aspen

In the heart of Switzerland's renowned wellness destination, Auroom and Leaderspa Pro created four bespoke saunas that merge architecture, craftsmanship, and nature. Each space embodies its own character—rocky, flowing, salty, and elemental—brought to life through refined detailing and CNC-crafted precision. Together, they form a multisensory journey that defines world-class spa design excellence.

PEBL Grand Sauna - design cabin product saunas

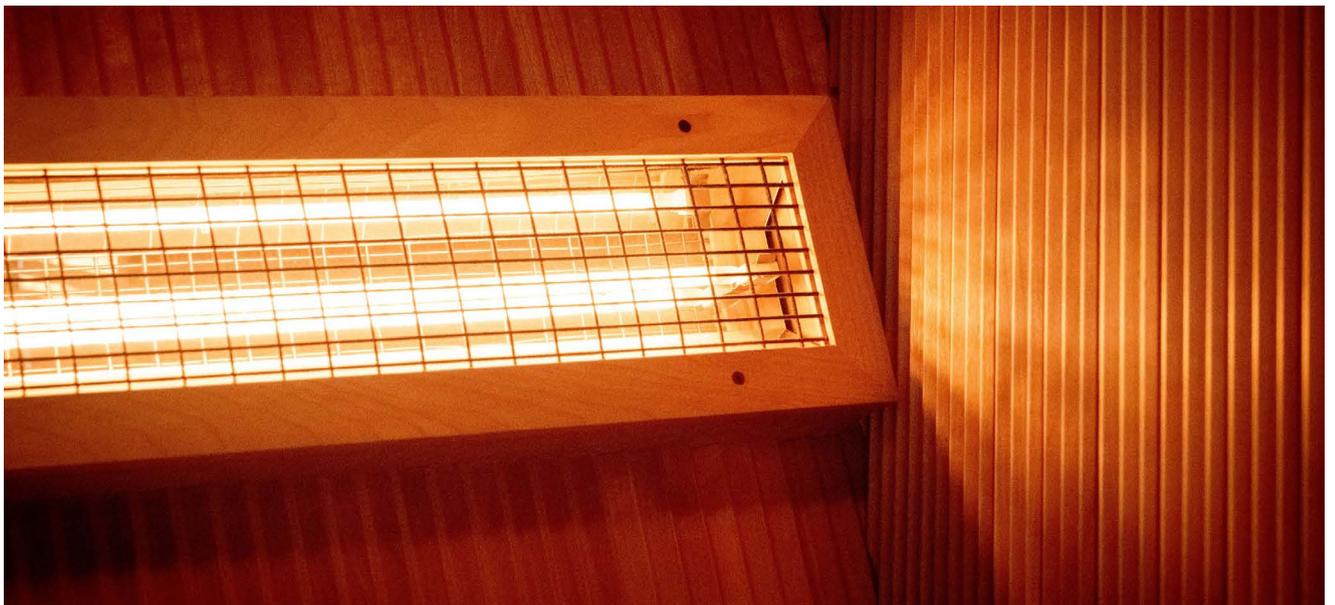

HUNGARY | 2024

ARCHITECT | Hello Wood
DEVELOPER / BUILDER | Hello Wood
PHOTO | Eszter Oláh

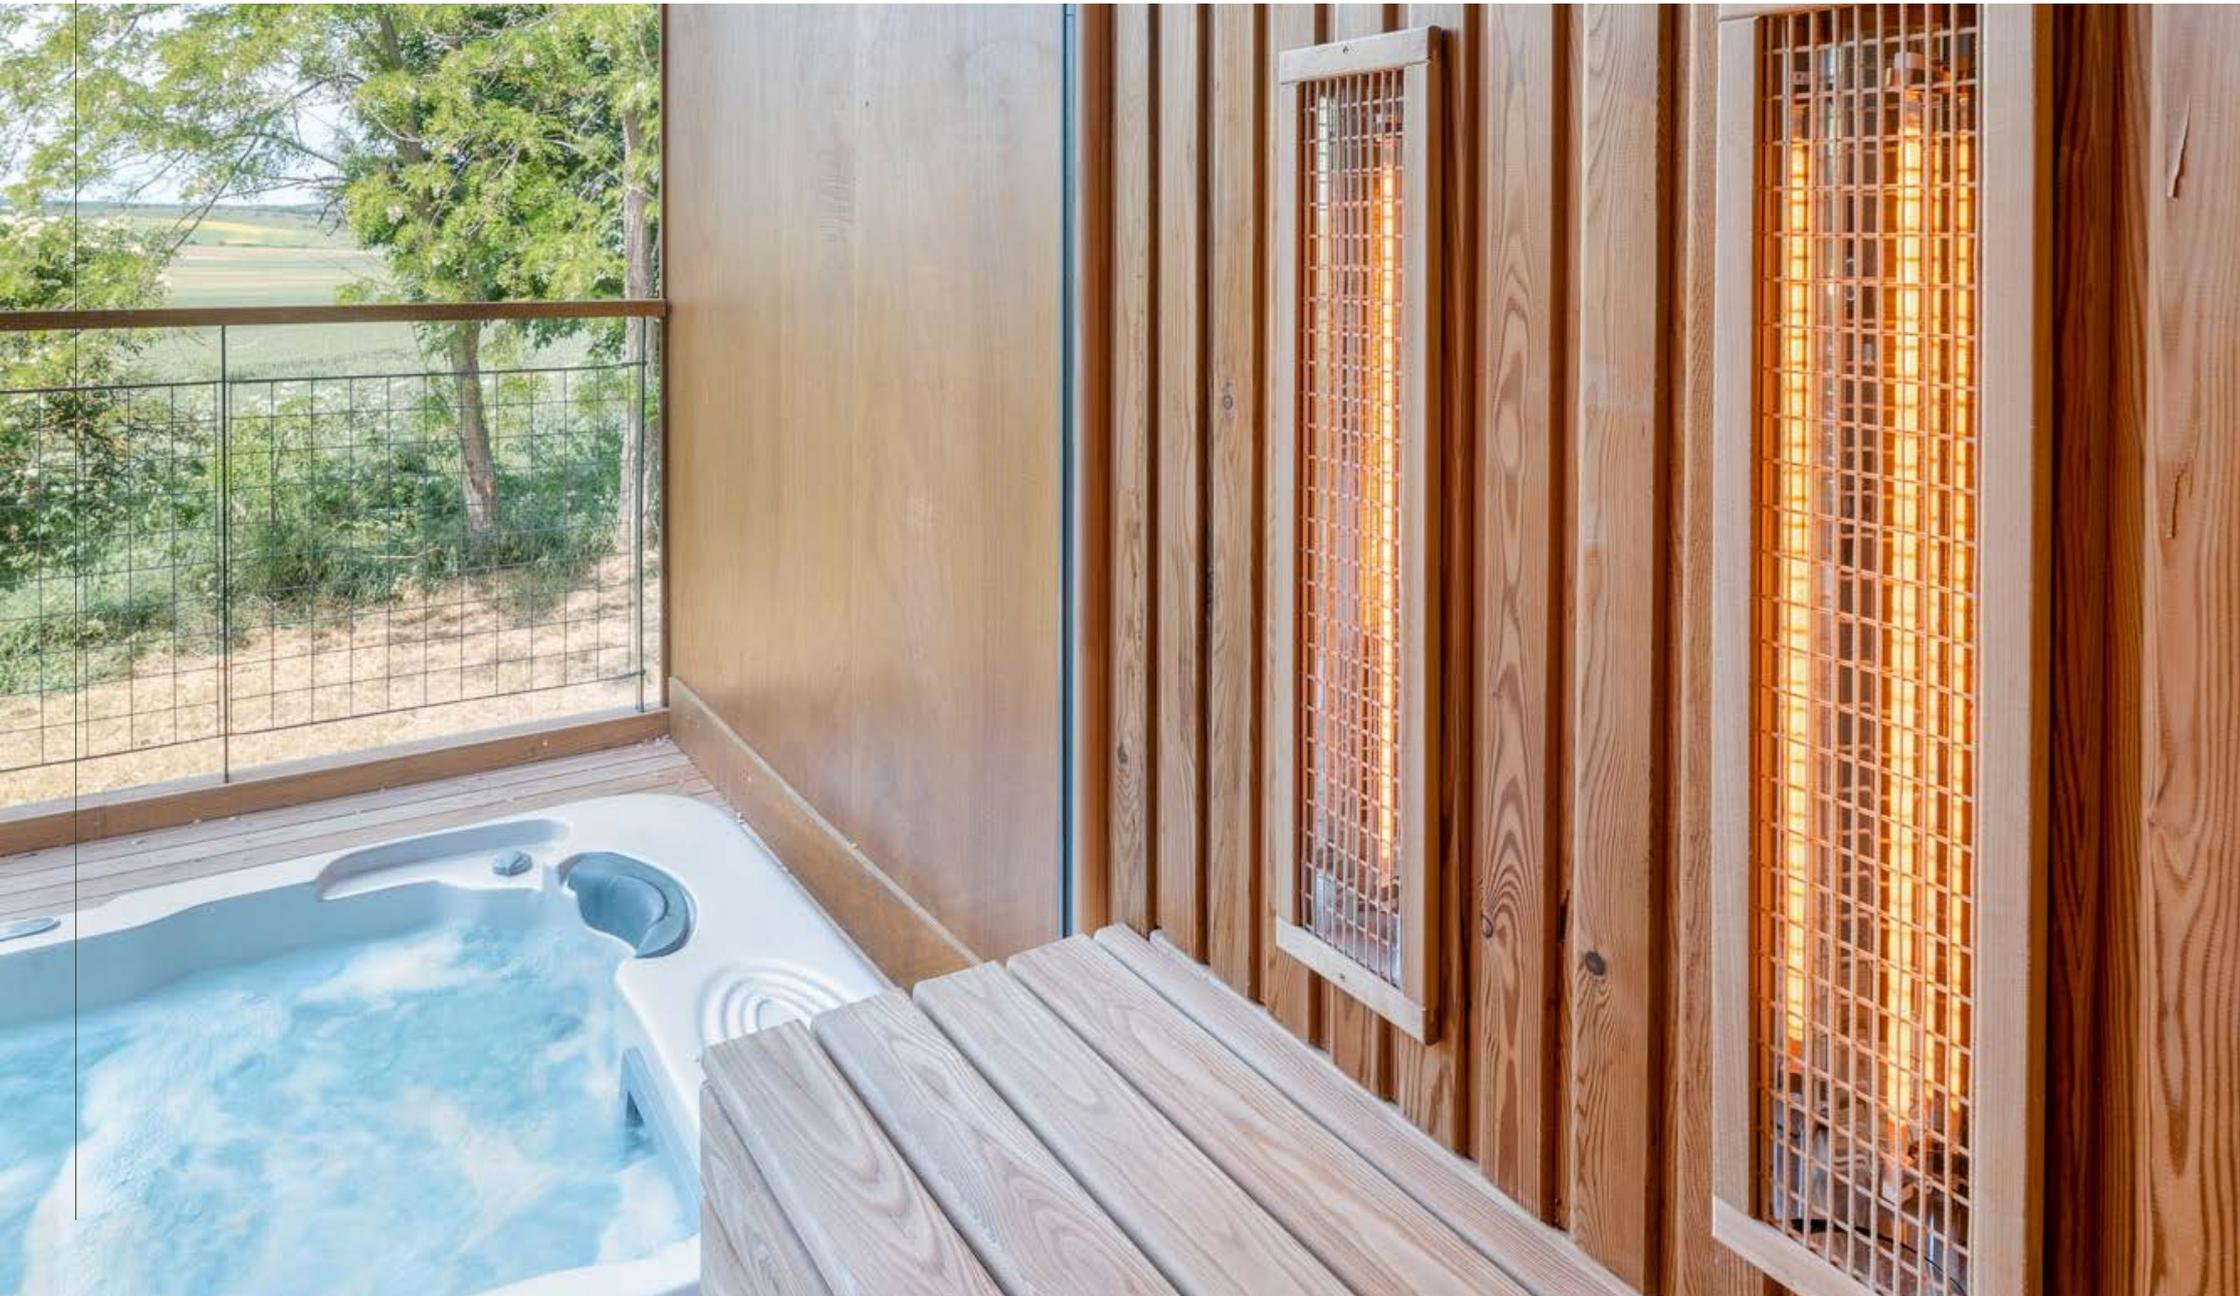

THERMORY PRODUCTS | VIRE thermo-aspen wall panels and thermo-aspen bench boards

Created for boutique hotels, eco-resorts, and private retreats, the PEBL Grand offers a luxurious, sustainable, and rapidly deployable hospitality solution. Combining futuristic aesthetics with premium comfort, it features a panoramic infrared sauna crafted from Thermory's thermally modified wood – blending natural warmth, durability, and design excellence with minimal environmental impact.

Rock Cabins - Saunas in luxury 5 star design cabins

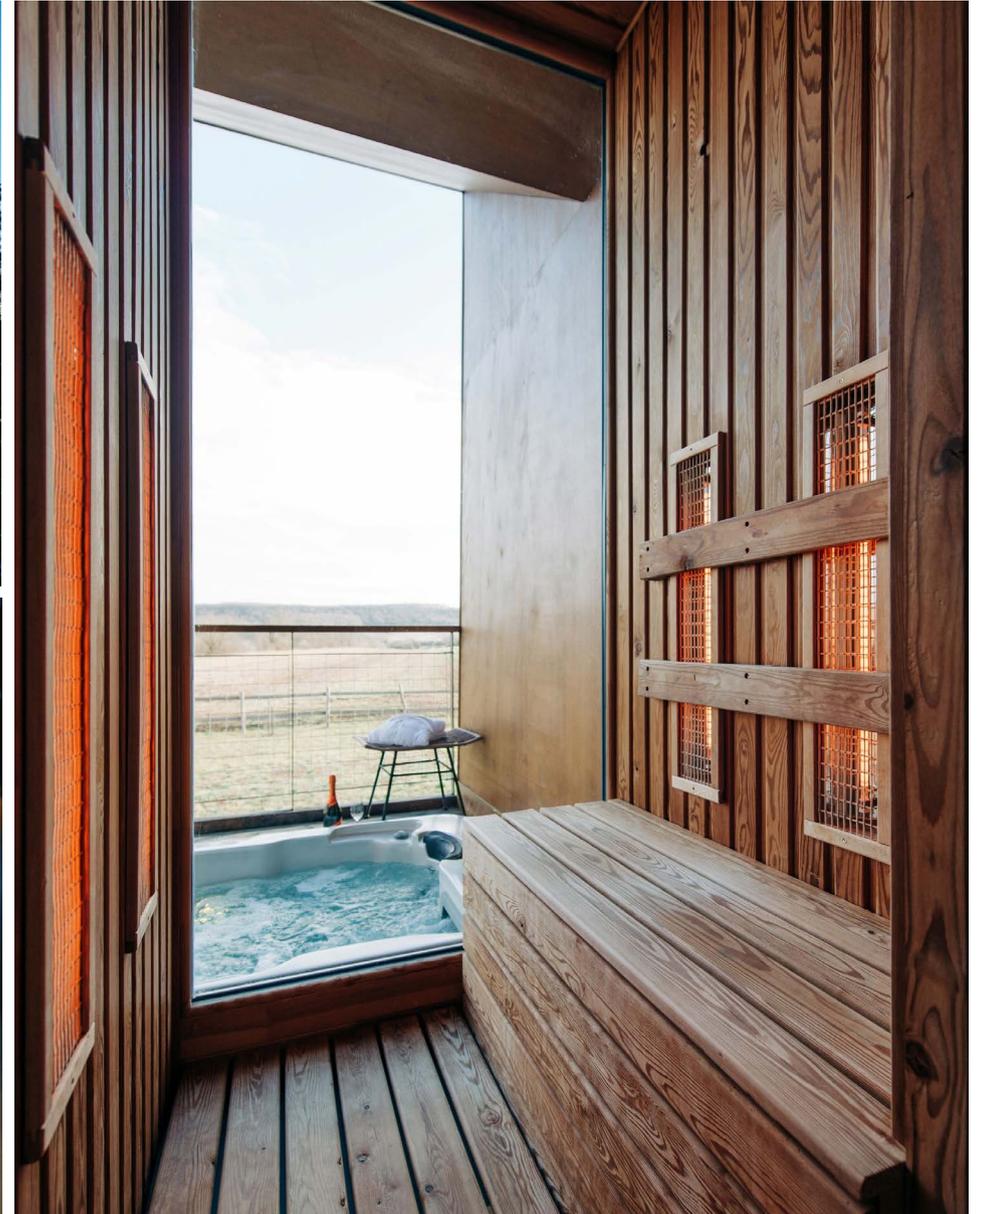

HUNGARY | 2024

ARCHITECT | Hello Wood
DEVELOPER / BUILDER | Hello Wood
PHOTO | Máté Lakos, Tamás Bujnovszki

THERMORY PRODUCTS | Sauna walls: Thermo-alder STS4, 15×120; Thermo-aspen SHP 21×90 floor moulding; Tikkurila Supi Sauna Wax treatment

Designed and built by Hello Wood, the award-winning Rock Cabins redefine luxury in the Balaton Uplands. Featuring private wellness areas with Thermory wood infrared saunas, they blend modern architecture with nature. Prefabricated for sustainability and efficiency, the cabins embody refined design, durability, and an authentic connection to their scenic surroundings.

BOBOR Sauna

SLOVAKIA | 2025

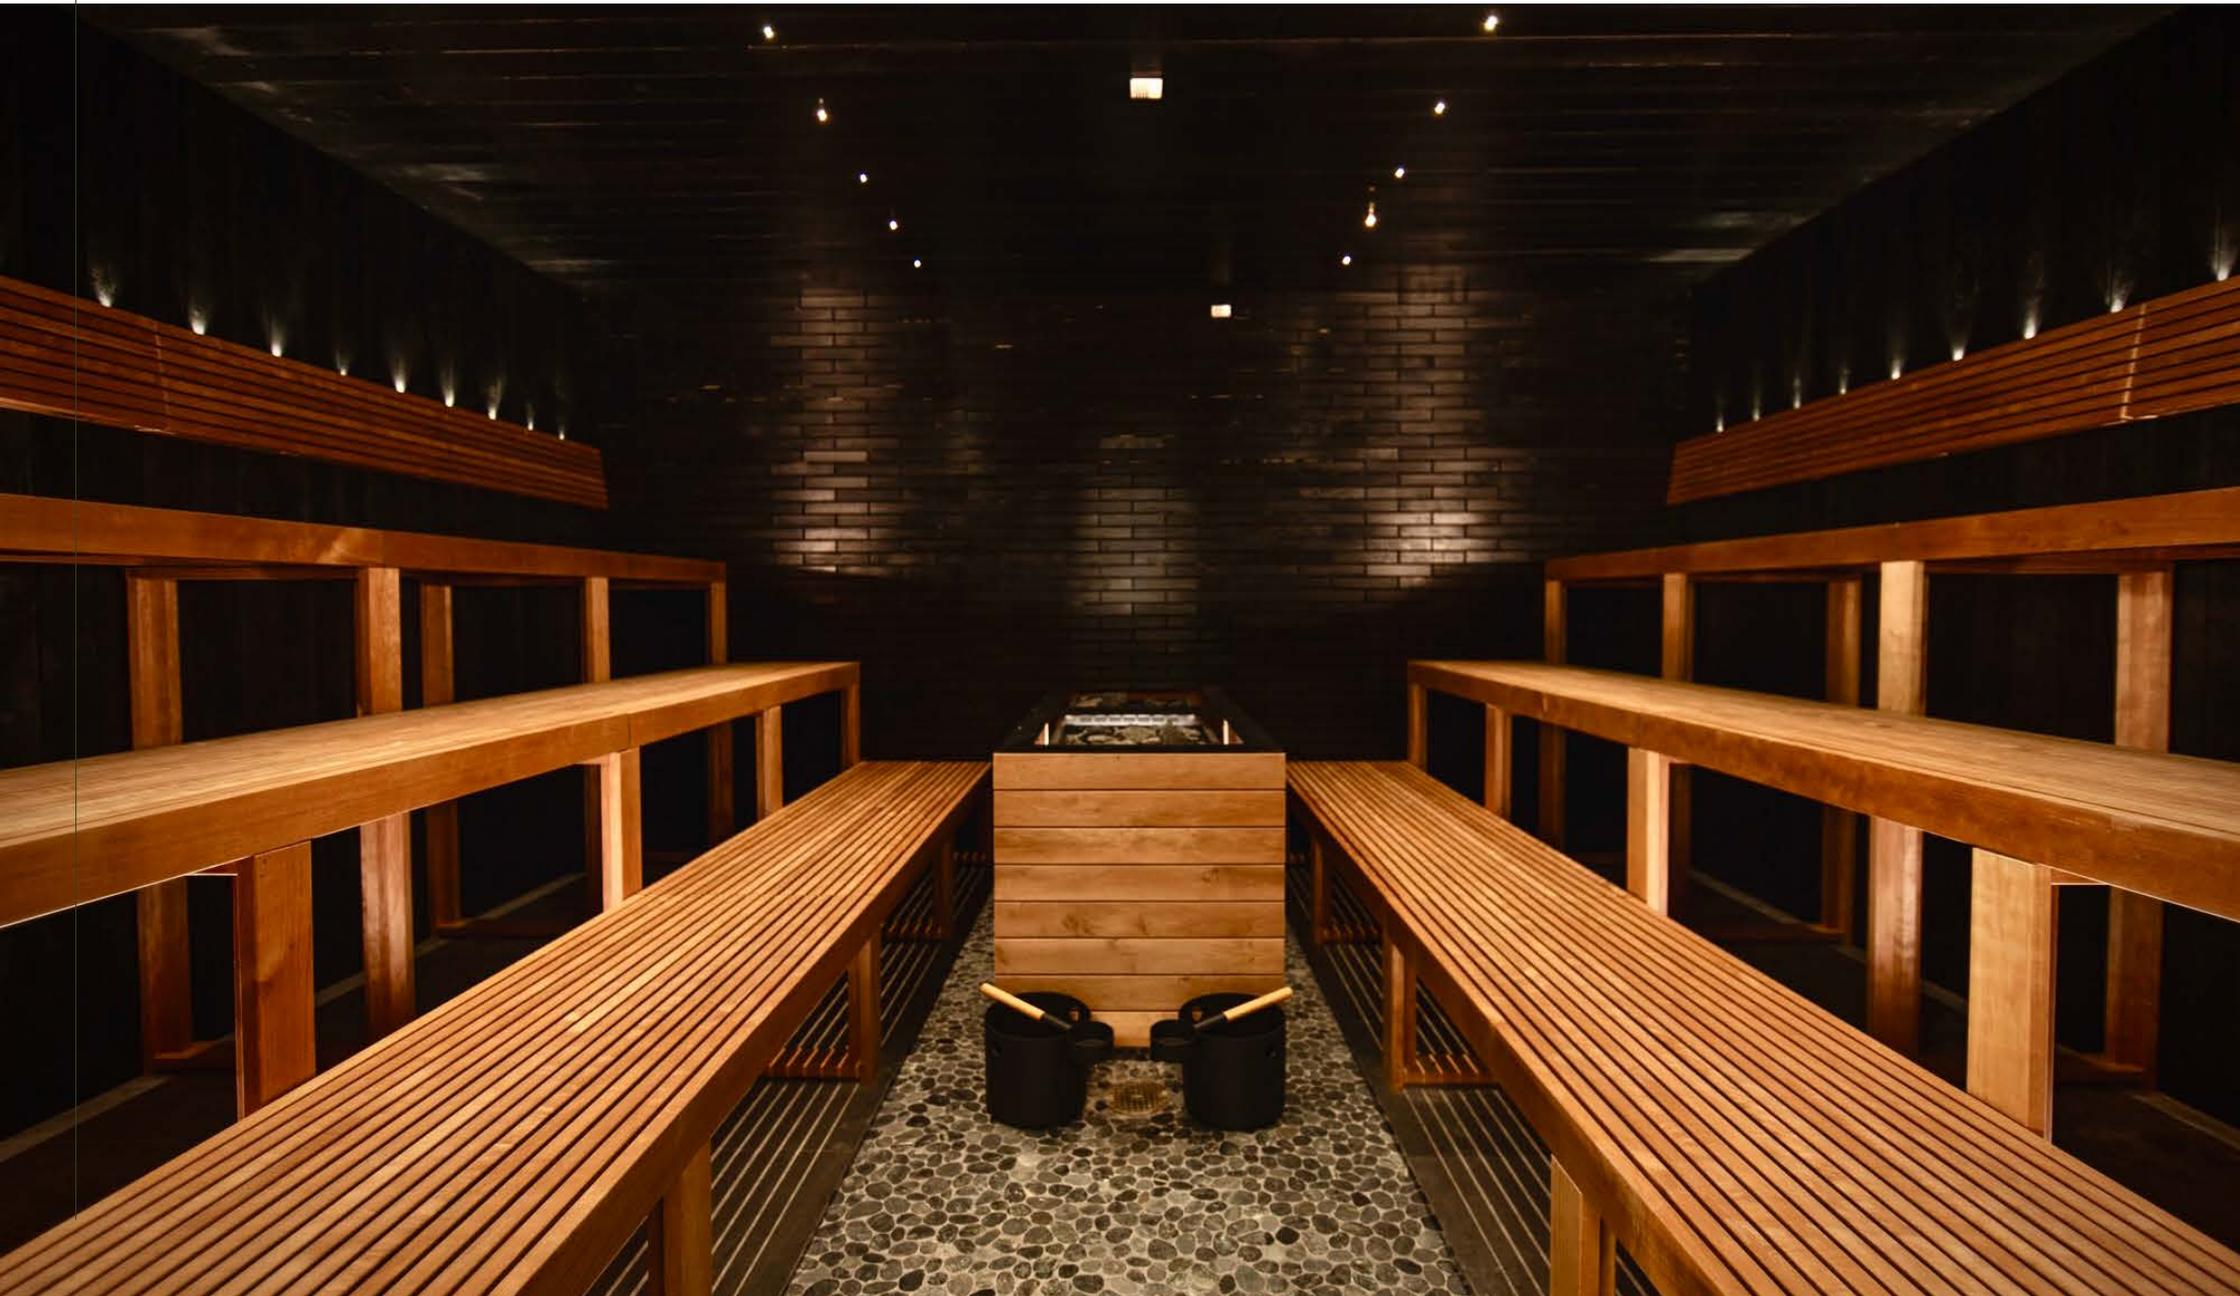

ARCHITECT | Ing. arch. Matej Kurajda, Mgr. art. Martin Šichman
DEVELOPER / BUILDER | Woodmaster SK, s.r.o. and OZ Sauna BOBOR
PHOTO | Katarína Janičková
THERMORY PRODUCTS | Exterior: Thermory thermo-spruce C15, 20×186 in Country grade, treated with the traditional Japanese shou sugi ban technique. Interior: Thermory alder 15×90 STS4, brushed and painted black with Tikkurila SUP1

Floating on the Danube in Bratislava, Sauna Bobor reconnects the city with its river through bold design and craftsmanship. Clad in shou sugi ban-treated Thermory spruce with a dark alder interior, it fuses tradition with innovation. This floating landmark serves as a gateway between the city and the water, uniting wellness and culture in a striking public space.

Sauna House Durham

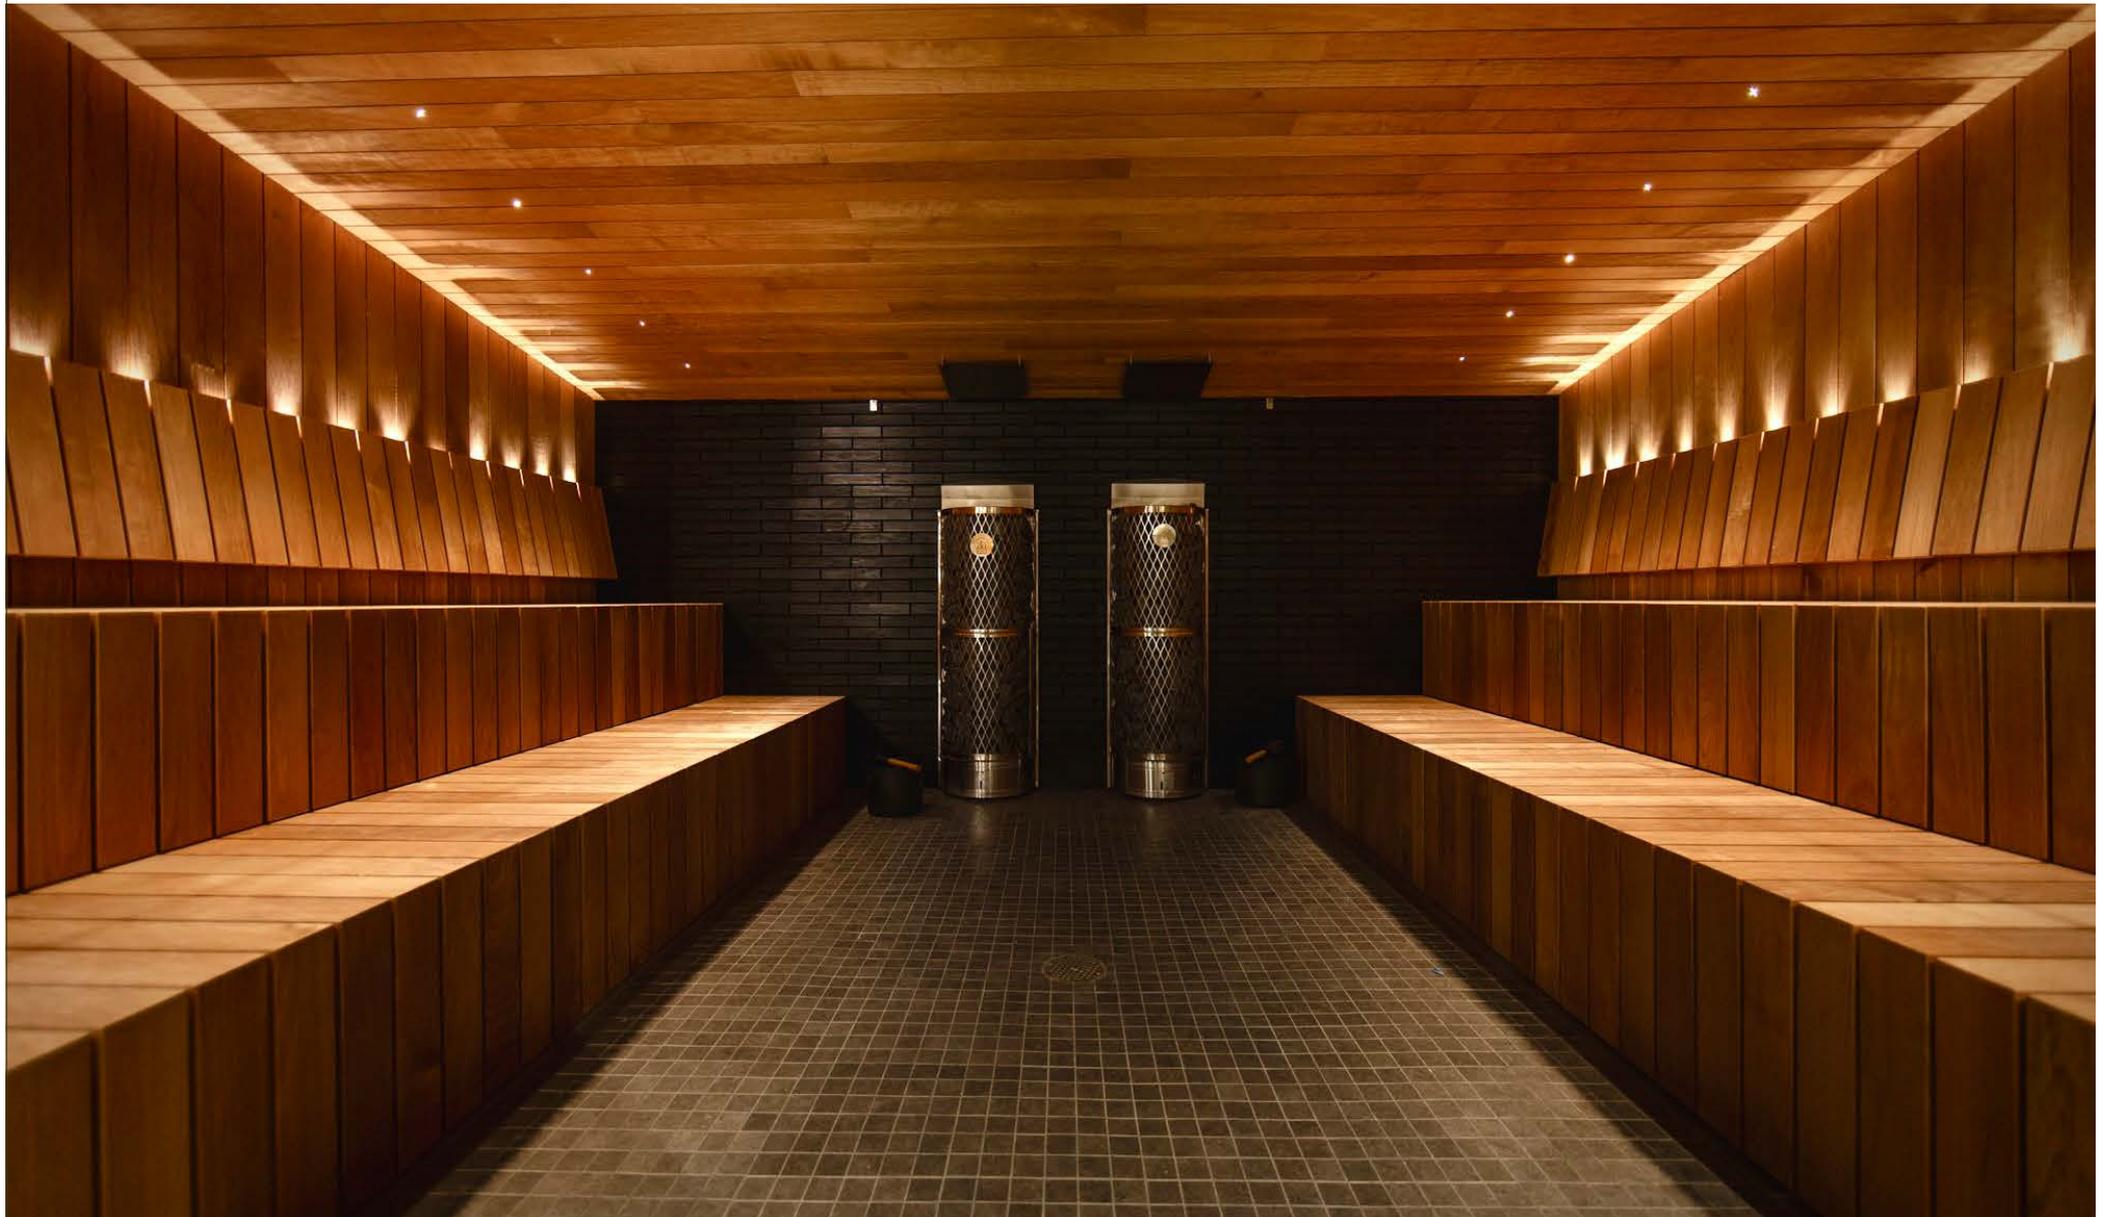

USA | 2024

ARCHITECT | Alliance Architecture
DEVELOPER / BUILDER | Gateway Construction, Sauna House
PHOTO | Joel Sandvos

THERMORY PRODUCTS | Thermo-aspen STF & STS

Designed with a focus on clarity and balance, these saunas embody pure minimalism. Using Thermory's thermally modified wood for its durability and refined aesthetic, the spaces achieve timeless symmetry and sustainability – proving that simplicity can be both elegant and enduring.

Sauna JUUP NUUK

CZECH REPUBLIC | 2025

ARCHITECT | WOVEN

DEVELOPER / BUILDER | Woodmaster SK, s.r.o. and workshop participants

PHOTO | Pavlína Blažeková

THERMORY PRODUCTS | Exterior cladding: Thermory thermo-spruce 20×68 D4B, roughened. Interior: Thermory alder 15×120 STP B walls and 28×65 SHP benches

Sauna NUUK in Hradec Králové, the country's first outdoor public sauna, embodies community and sustainability. Expanded in 2025 through a participatory workshop, it was co-built by volunteers learning about thermo-wood and eco-friendly design. With Thermory spruce cladding and alder interiors, NUUK offers an open, educational, and inclusive model for public sauna culture.

The Greenacres Community Sauna

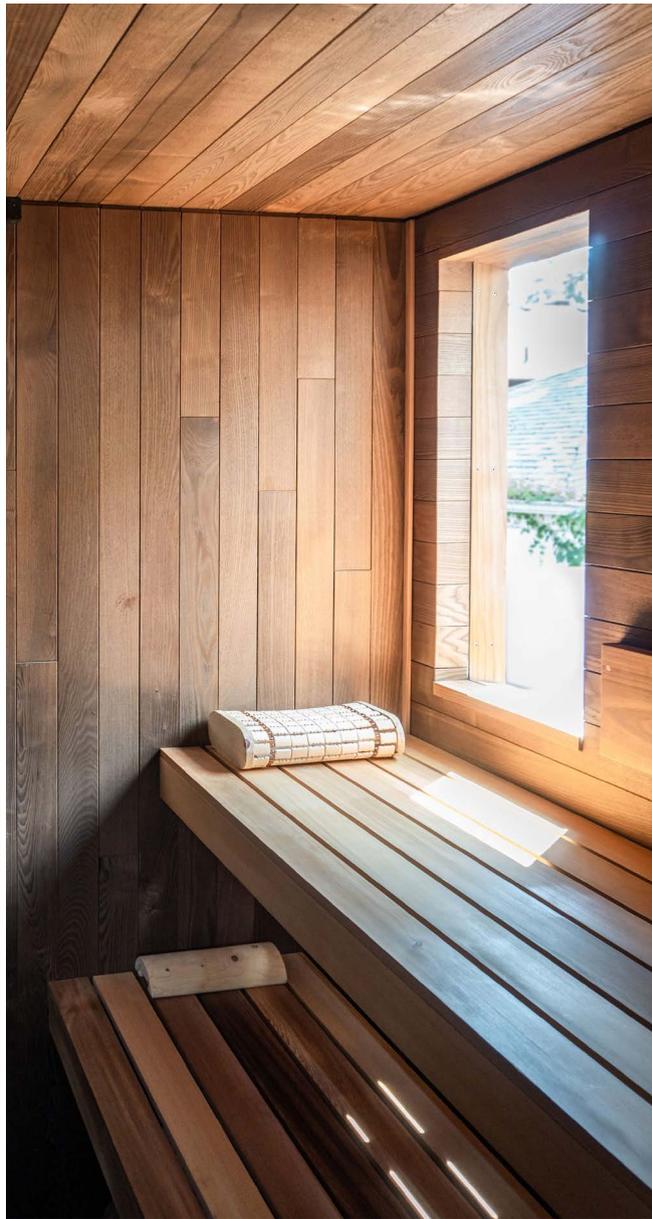

USA | 2025

ARCHITECT | The Sandhill Saunaworks
DEVELOPER / BUILDER | The Sandhill Saunaworks
PHOTO | Vincent Suchanek

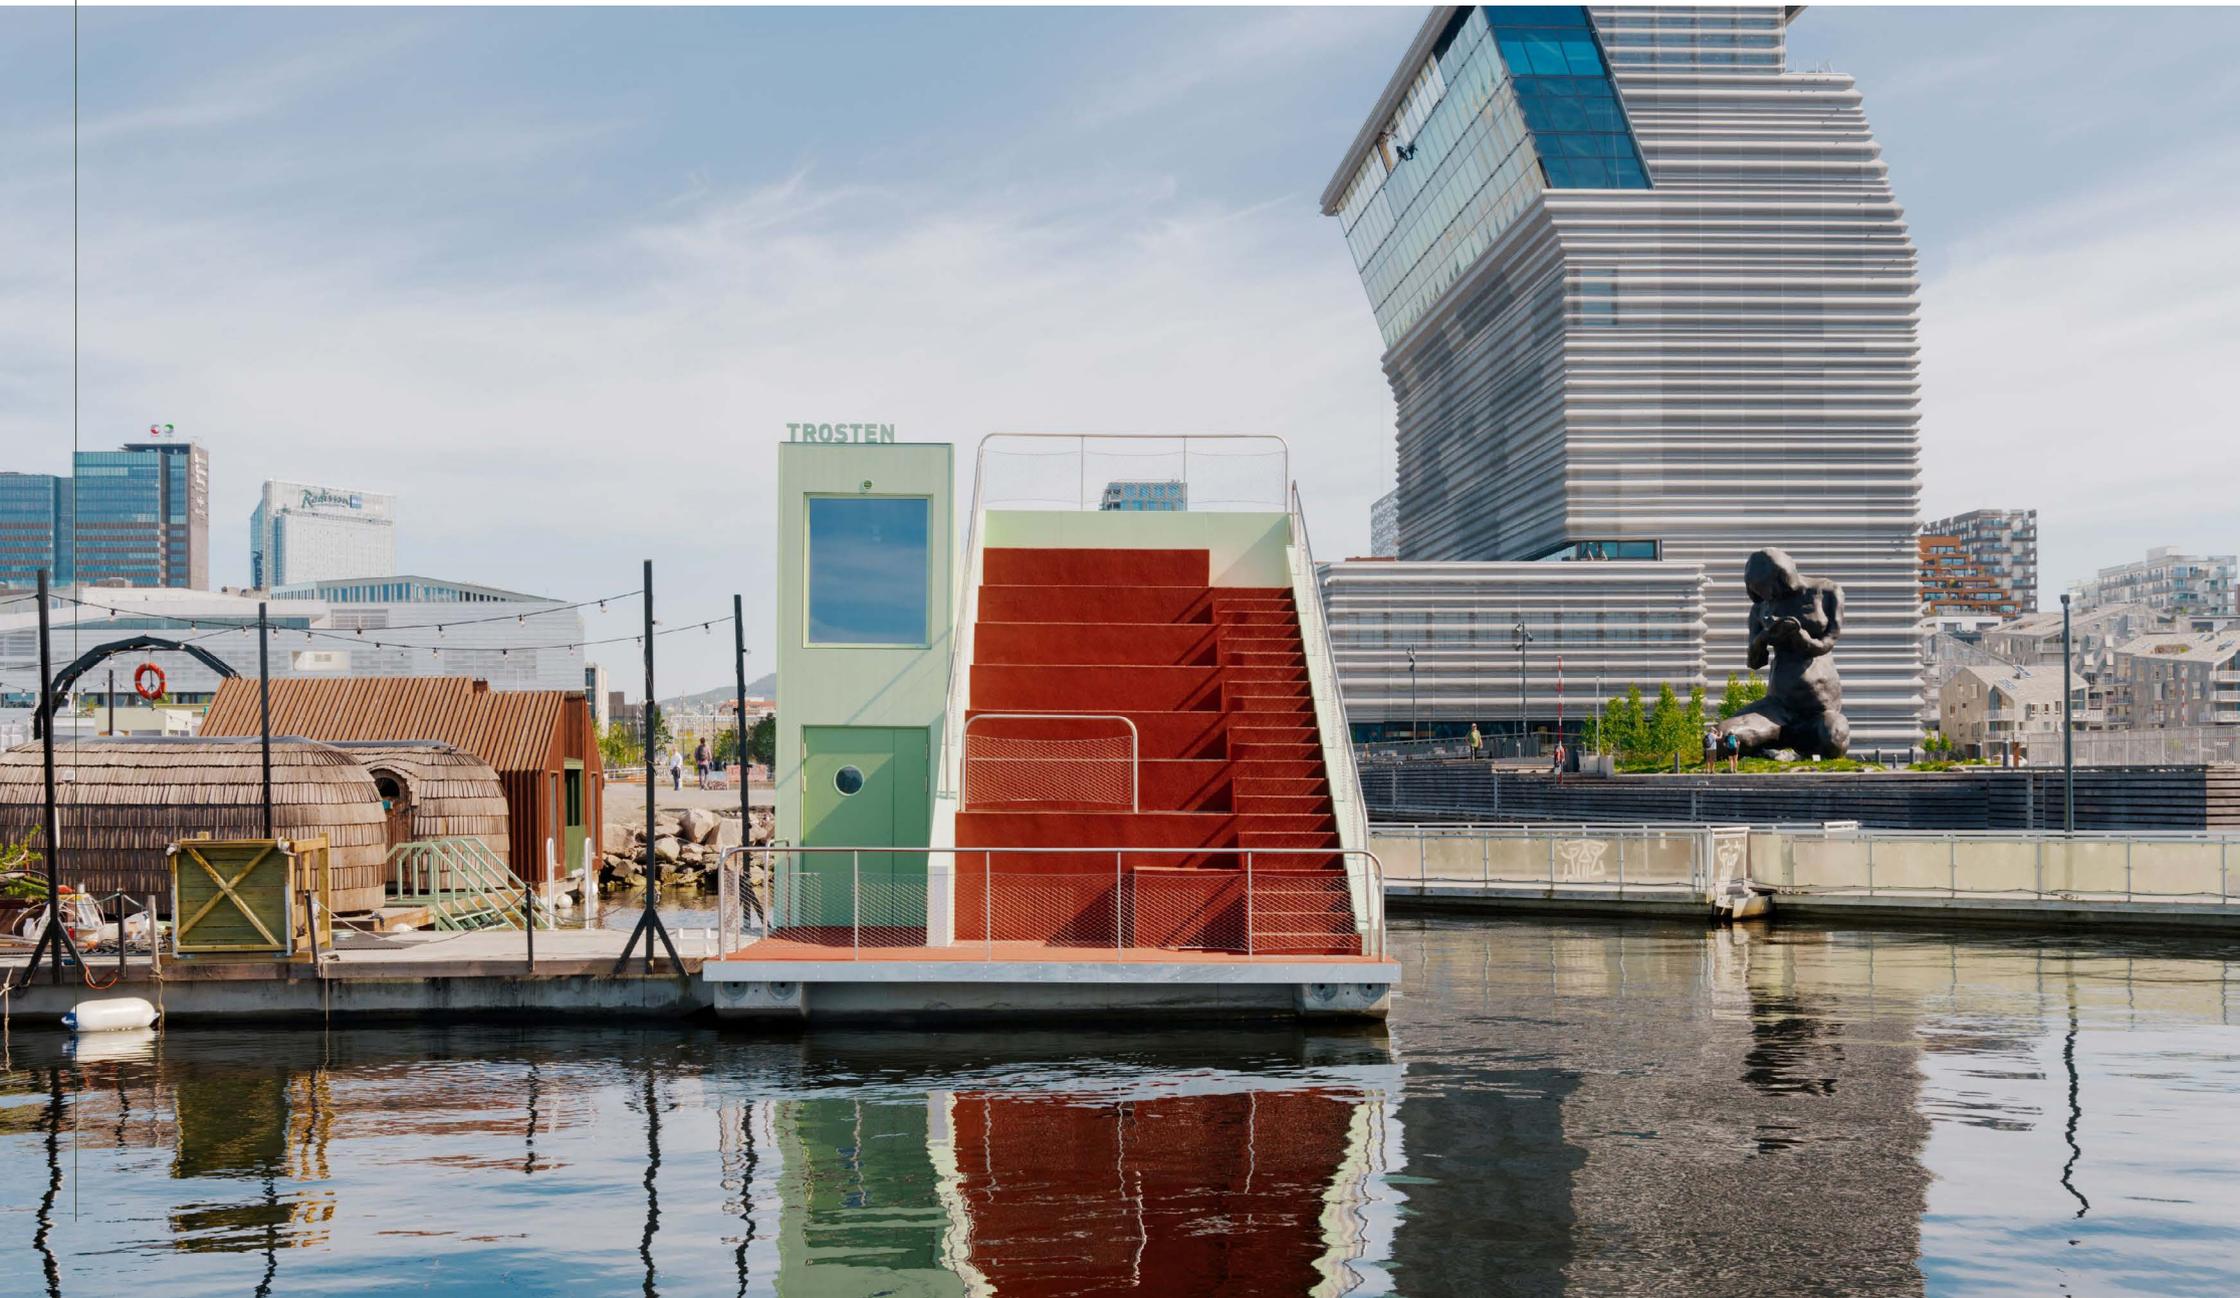

THERMORY PRODUCTS | Exterior cladding: Thermo-pine C19 rear and sides cladding; thermo-pine and -spruce porch rafters; thermo-pine porch flooring; thermo-radiata trim for entry door

Created as a neighborhood gathering space, this sauna serves as a social focal point that fosters connection and revitalization. Set within a heritage neighborhood, it reinterprets traditional Tudor-style architecture through a modern lens. Using Thermory wood as a defining material, it seamlessly blends North African influences, community spirit, and sustainable design.

Trosten Sauna Oslo Oceas Side

NORWAY | 2024

ARCHITECT | Estudio Herreros Barcelona
DEVELOPER / BUILDER | Oslo Sauna Association
PHOTO | Becky Zeller + Einar Aslaksen

THERMORY PRODUCTS | Sauna: thermo-alder STS4. Exterior entry area:
thermo-spruce C15, 20x186

Located in the heart of Oslo, the Trosten floating sauna embodies accessibility, sustainability, and design excellence. Built from recycled aluminum and Thermory thermowood, it welcomes all—including wheelchair users—with adaptive architecture and refined warmth. Overlooking the fjord, it offers an inclusive wellness experience that truly brings sauna to the people.
